

Brisbane Gynaecological Cancer Research Symposium

Friday 31st October 2014

Translational Research Institute

- 13.00 ***“New Targets in Ovarian Cancer – the importance of collaboration between the laboratory and the clinic”*** Prof Anna DeFazio, Westmead Cancer Institute
- 13.30 ***“Using Mendelian randomisation to study gynaecological cancer aetiology: body size and ovarian cancer”*** Suzanne Dixon (QIMRB)
- 13.50 ***“LINE-1 Retrotransposition in High Grade Serous Ovarian Cancer ”*** Thu Nguyen (MMRI/TRI)
- 14.10 ***“Association of genes at 9p22 with progression free survival in ovarian cancer”***
Jonathan Beesely (QIMRB)
- 14.30 ***“Hypoxia mediated gene repression”*** Jason Lee (QIMRB)

Coffee break – Kindly sponsored by **Roche**

- 15.20 ***“Molecular understanding of obesity related carcinogenesis – endometrial cancer as a disease model”*** Prof. Frank Gannon (QIMRB)
- 15.50 ***“Measuring the gap: Aboriginal and Torres Strait Islander women’s participation in cervical screening”*** Abbey Diaz (NICSP)
- 16.10 ***“Targeting the cell surface protein CDCP1 in a model of ovarian cancer”***
Brit Harrington (MMRI / TRI)
- 16.30 ***“CDCP1 in ovarian clear cell carcinoma – an initiating story?”*** Yaowu He (MMRI / TRI)
- 16.50 ***“The effects of statins on the ovarian tumour microenvironment”***
Rakhee Ramakrishnan (MMRI / TRI)
- 17.10 ***“Investigating mechanisms of resistance to FGFR inhibitors in endometrial cancer”***
Leisl Packer (QUT / TRI)
- 17.30 ***“KLK7 and Ovarian Cancer”*** Lakmali Munasinghage Silva (QUT / TRI)
