ANIMAL WELFARE SYMPOSIUM INVITATION

Date: Friday, 11th May 2018

TRANSLATIONAL RESEARCH INSTITUTE
Auditorium, 37 Kent Street, Woolloongabba, QLD 4102

ANZLAA, TRI, UQBR and Tecniplast Australia are delighted to announce the program for the 2018 Animal Welfare Symposium, a contemporary animal welfare event presented by international and local speakers;

Associate Professor Betty Theriault - DVM, DACLAM, President of the International Association of Gnotobiotics. Director, Gnotobiotic Research Facility, The University Of Chicago, USA
Facing Gnotobiotics Challenges & Segmented Filamentous Bacteria

Associate Professor Ingrid Winkler - Senior Research Fellow and head of the Stem Cells and Cancer group. Mater Research, Brisbane
Impact of Microbiome. Models affected by 'clean facilities'

Professor Craig Franklin - Deputy Head of School, Executive Director of Research Ethics, Professor in Zoology. University of Queensland in partnership with Australia Zoo, Brisbane
Use of Telemetry in addressing one of the 3R's - Refinement

Dr Rebekah Scotney - Clinical Academic, School of Veterinary Science. University of Queensland & Felicity Couperthwaite, Health and Wellbeing Manager, Queensland University of Technology
Compassion Fatigue – Where are we now?

Dr Judy Cawdell-Smith – Senior Lecturer in Equine Science & Affiliated Senior Fellow. University of Queensland, Brisbane
Equine Abortion Models in Guinea Pigs and the Amniotic Microbiome

Associate Professor Sheila Donnelly – Senior Lecture, Faculty of Science. University of Technology, Sydney
Training and Accreditation. Why is it important & where do you start?

Dr Brian Tse - Senior Preclinical Imaging Scientist, Preclinical Imaging Core Facility. Translational Research Institute, Brisbane
Welfare Issues associated with Radiation Therapy

Refreshments on arrival and morning tea and lunch provided
To secure your place at this exciting event please RSVP to:
events@tecniplast.com.au before Friday 4th May 2018

PROGRAM PREVIEW

8:15-9:00	Registration and Refreshments	
9:00-9:15	Opening and Welcome	Professor Ian Frazer AC FRS Faculty of Medicine The University of Queensland
9:15-10:15	Facing Gnotobiotic Challenges Presented by the Microbiome Frontier	Associate Professor Betty Theriault DVM, DAACLAM, President of the International Association of Gnotobiology. Director, Gnotobiotic Research Animal Facility, The University Of Chicago, USA
10:15-10:45	Impact of the Microbiome, models affected by 'clean facilities' Case study	Dr Ingrid Winkler Associate Professor Stem Cells and Cancer Mater Research – University of Queensland
10:45-11:15	Morning tea	
11:15-11:45	Welfare issues associated with radiopharmaceutical therapy	Dr Brian Tse Senior Preclinical Imaging Scientist Translational Research Institute
11:45-12:15	Field-based studies and the benefits of taking the lab to the animal: The role of telemetry in achieving "refinement" within the 3R framework	Professor Craig Franklin Deputy Head, School of Biological Sciences University of Queensland
12:15-12:45	Segmented Filamentous Bacteria: A commensal bacterium contributing new insights into the complex world of microbes, host immune regulation and animal model fidelity	Associate Professor Betty Theriault DVM, DAACLAM, President of the International Association of Gnotobiology. Director, Gnotobiotic Research Animal Facility, The University Of Chicago, USA
12:45-13:45	Lunch	
13:45-14:45	Compassion Fatigue – where are we now? Case study	Dr Rebekah Scotney Clinical Academic School of Veterinary Science Faculty of Science. University of Queensland Felicity Couperthwaite Health and Wellbeing Manager Queensland University of Technology
14:45-15:15	'The guinea pig – a model for Equine Amnionitis and Foetal Loss'	Dr Judy Cawdell-Smith BVSc(Hons), PhD, DipVetClinStud. Senior lecturer in Equine Science. School of Agriculture and Food Sciences. University of Queensland
15:15-15:45	Training and accreditation why it is important? And where do you start Case study	Associate Professor Sheila Donnelly University of Technology, Sydney
15:45-16:15	Tech Talk - Evaluation of the release kinetics of fentanyl patches in rabbits using behavioural and blood concentration measurements	Rebekah Crasto Faculty of Medicine, University of NSW 2017 Tecniplast Australia Scholarship Research Award recipient
4:15pm	Final Comments and Close
