LOCATION:

Tea Room Level 7

DATE:

February 1, 2023

TIME:

9:30 – 11:30 a.m.

Morning Tea will be served

Charles River Laboratories provides tailored global testing and manufacturing solutions to support clients throughout the biologic development cycle, from discovery through preclinical and clinical studies, to product release. Combined with our comprehensive portfolio of products and services for microbial quality control, including Endosafe® endotoxin testing, Accugenix® microbial identification, and Celsis® microbial detection, we have the necessary tools to guide clients throughout the drug development process, leading to the release of safe and effective vaccines, cell and gene therapies, and biosimilars.
