

Are you ready to boost your lab's efficiency?

When:

Wednesday, 17th January, 2024
9:30 to 11:30 am

Where:

Level 7 Tea Room, Translational Research Institute

Join us for a chat and morning tea.

What you will learn:

- Discover the **Andrew+ pipetting robot**: The key to effortless transition from manual procedures to automated, error free workflows. Seamlessly integrate with the OneLab ecosystem for enhanced reproducibility, traceability, and remote monitoring in any lab setup.
- Discover the **ACQUITY Premier Solution**: Empower your lab to make informed decisions and reduce risks with enhanced analytical capabilities for detecting more sample components from the very beginning. Achieve superior detection limits and improved recovery. Decrease time to result, reduce time on method development, and boost overall lab efficiency.
- Discover **MaxPeak Premier Solutions**: A revolutionary approach to separations and metal-sensitive analyte detection. With reduced non-specific binding, it provides dramatic improvements in applications including oligonucleotides, peptides, glycans, and phospholipids. Elevate sensitivity, efficiency, reproducibility, and result confidence.
