

Clinical Research Facility (CRF)

The Translational Research Institute Clinical Research Facility or CRF is located at the Princess Alexandra Hospital. It provides specialist services and resources to conduct research. This research may include trials using new medicines and medical equipment.

The CRF was opened in December 2014. Since then over 250 research studies have been conducted in the CRF involving thousands of people. The CRF has comfortable and spacious rooms to provide a restful environment. There is full access to medical and emergency services from the Princess Alexandra Hospital.

The CRF conducts high quality research. This research aims to improve patient care and promote quality health care. Patient safety is a priority. Dedicated research staff provide care to participants.

All research at the CRF is approved by a Human Research Ethics Committee. It also meets Australian and International guidelines.

If you are interested in taking part in a clinical trial talk to your doctor. You can also find more information about clinical trials by contacting the CRF.

CRF Location

The CRF is located on Level 4 of the R-Wing at the Princess Alexandra Hospital.

Directions to the CRF

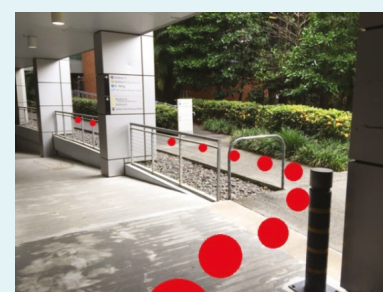

Follow the red dots!

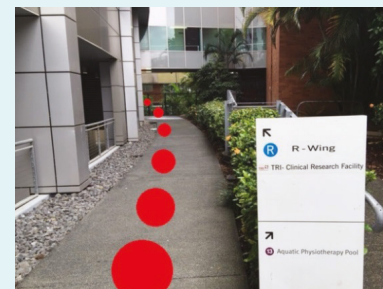

From the main hospital foyer walk past Starbucks and down the corridor to the end,

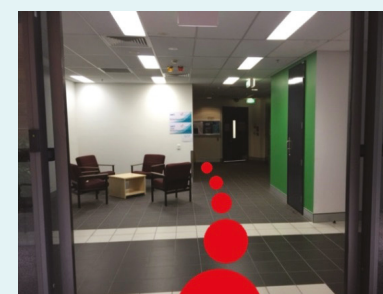

through the doorway to your left at top of ramp,

turn right then immediately left.

Continue past the R-wing sign, and along the curve of the building,

to the ground level foyer of R-Wing. Take the lift to Level 4 where the CRF Reception area is located.
